S. SIVAKUMAR

B.Tech Information Technology Student | AI/ML & Full-Stack Development
Tiruppur, Tamil Nadu | 7871581868 | sivasekars2005@gmail.com
LinkedIn: linkedin.com/in/sivakumar240905 | GitHub: github.com/siva240905 | LeetCode: Siva_2409

CAREER OBJECTIVE

B.Tech Information Technology student with hands-on experience in Python, Java, JavaScript, React.js, Node.js, machine learning, and full-stack application development. Built AI/ML, analytics, QR-based event management, and web application projects. Completed an AIML internship covering data preprocessing, feature engineering, model evaluation, and integration of ML solutions into production-style software applications.

EDUCATION

B.Tech in Information Technology — VSB College of Engineering Technical Campus, Coimbatore
2023 – 2027 | CGPA: 7.6

Class XII (HSC) — Subash Matric Hr. Sec. School, Tiruppur | 2023 | 74.67%

Class X (SSLC) — Subash Matric Hr. Sec. School, Tiruppur | 2021 | 100%

PROJECTS

AI-Based Government Scheme Assistant

- Designed and deployed a conversational AI assistant (live at govt-scheme-ai.vercel.app) that recommends relevant government welfare schemes based on user profile inputs
- Integrated NLP-based query understanding to map free-text user questions to the correct scheme category, including eligibility checks and category-wise browsing
- Built a full-stack web interface (HTML, CSS, JavaScript) with smart search and filtering, reducing manual lookup effort for citizens seeking scheme information

Cricket Performance Analysis (Machine Learning)

- Built a Python analytics pipeline (Pandas, Matplotlib) evaluating player performance across 9 metrics — runs, strike rate, average, economy, wickets, and overs
- Applied ML techniques to compare and predict player performance trends across ODI, T20I, and Test formats
- Generated comparative visualization dashboards to help selectors and analysts make data-driven team selection decisions

Smart Event Entry System

- Developed a digital platform to manage and validate event participants with real-time entry tracking
- Implemented QR-code-based authentication to streamline check-in and prevent unauthorized access
- Built a live monitoring dashboard for attendee counts and event analytics

TECHNICAL SKILLS

Languages: Java, Python, JavaScript
Frontend: HTML, CSS, React.js
Backend: Node.js
Databases: SQL, NoSQL
Tools: Git, GitHub

INTERNSHIP EXPERIENCE

AIML Intern | Nxtlogic Software Solutions

- Developed and deployed machine learning models in Python using scikit-learn
- Performed data preprocessing, feature engineering, and model evaluation on real datasets
- Collaborated with the development team to integrate ML solutions into functional software applications

Marketing Intern | Corizo

- Supported digital marketing campaigns across social media and online platforms
- Analyzed campaign performance metrics to measure reach, engagement, and conversions
- Contributed to content strategy and audience targeting

CERTIFICATIONS & TRAINING

Data Science with Python & Power BI (NoviTech/LetsUpgrade) • React Development & Full-Stack Fundamentals (LetsUpgrade) • Python & Java: OOP, Collections Framework (Mercy Technologies) • TechTrek: Full-Stack Dev to Industry Mastery (CIT) • MENDIX Application Development Workshop (SSEC)

Areas of Interest: Artificial Intelligence & Machine Learning | Full-Stack Development | Data Science
